Why Should You Have Your Ductwork Cleaned?

Every time your central heating/cooling system, furnace, or air conditioning system runs, dust, dirt, pollen, pet dander, and other airborne biological contaminants are pulled into your ductwork. Over time, they build up and create an ideal breeding ground for mold spores, bacteria, fungus, mildew, and other microbes.

Turn your system on, and all of these contaminants are distributed throughout your home. Respiratory ailments, itchy eyes, sore throats, and sneezing are common symptoms of a system that needs cleaned.

Not only does dirty ductwork make you sick, the accumulation of dust and dirt on cooling coils reduces your system's efficiency. **This increases your cost to operate your system by as much as 15%.**

HB McClure's Air Quality Duct Cleaning helps protect your family's health, keep your home clean longer, and lower your utility bills.

Why Choose HB McClure?

- Providing trust, quality, and value to central Pennsylvania homes and businesses for over 100 years
- Nearly three decades of duct cleaning and air quality improvement experience
- Competitive pricing, experienced and friendly staff
- Top-of-the-line equipment, including Abatement Technologies' negative air HEPA vacuum and air sweeping system and Rotobrush's HEPA BrushBeast™ air duct cleaning machine
- Full range of air quality services
- Indoor air filtration systems
- Humidification systems
- UV air purification systems
- Dryer vent cleaning
- Duct encapsulation
- Duct replacement (using our in-house duct fabrication shop)
- Residential and commercial duct cleaning services

Our Process

We don't just clean your vents. Our process and equipment provides a comprehensive cleaning of vents, ducting, and your central air system. This air quality service includes cleaning of your vents/ registers and the ducting from the vents/ registers back to your central air system. After the duct is cleaned, we clean the parts of your central air system that air quality attacks. These parts include the indoor/evaporator coil, the blower, the air handler insulation, and the condensation system. All work is performed with HEPA-filtered cleaning machines operated by our experienced and professional staff.

HB McClure Company is a full-service resource for all your heating, cooling, plumbing, and home comfort needs:

HEATING

AIR CONDITIONING

FUEL OIL & PROPANE

PLUMBING

24/7 EMERGENCY SERVICE

MAINTENANCE AGREEMENTS

GEOHERMAL SYSTEMS

DUCT CLEANING

WATER CONDITIONING SYSTEMS

HUMIDITY CONTROL

INDOOR AIR FILTRATION

BACKUP GENERATORS

ENERGY MANAGEMENT SYSTEMS

Testimonial

“What a great experience and I’m not just saying that. There was very little noise, no dust or debris, and your team cleaned more than I expected, including the drain pan under the refrigerator! I was appalled by what we’ve been living with in our ductwork and feel so much better now that it’s been cleaned. A great experience overall. Thank you!”
