**HB McClure Installs New HVAC System in Pride of the Susquehanna
Historic Project Recognized Nationally by Global HVAC Manufacturer**

Harrisburg, PA (December 2015) – [HB McClure Company](http://www.hbmccclure.com), central Pennsylvania’s oldest and most diverse commercial and residential mechanical contractor, was named runner-up (Northeast Region) in Fujitsu General America’s Halcyon Contest for HB McClure’s HVAC work aboard the Pride of the Susquehanna Riverboat. After successfully completing this work, HB McClure submitted the project to the contest, which is open to HVAC contractors and distributors nationwide who have provided solutions to unique heating and cooling problems with ductless mini systems.

The Pride of the Susquehanna was constructed in 1988 and had its original HVAC system, which was undersized and performed inadequately. HB McClure was called on to install a comfortable HVAC system with minimal impact to the boat’s existing aesthetics. By installing a Fujitsu ductless system with wireless remote, HB McClure’s team was able to complete the project on time and within budget with no disturbances to the boat’s structure.

“The Pride of the Susquehanna is a Harrisburg landmark and only the most prominent mechanical contractors in the area were considered for the project,” said Robert Whalen, President of HB McClure. “Despite the tight spaces available for new equipment, our team not only installed the new system without compromising the aesthetics, but completed the project in time for the Pride’s Mother’s Day Cruise.”

HB McClure is well-known throughout central Pennsylvania as a leading provider of HVAC services including heating, cooling, plumbing, electrical, propane, fuel oil, home comfort and more.
